Context: The existing facility was a Nursery come kids care facility that met certain minimum requirements. We were tasked with converting the same into a high design quality facility for the Audubon Elementary School.

Concept: For the Chicago Public Schools we have created a 7 classroom and multi-purpose space Pre K education facility. Our details for picture windows scallops art windows and play areas have proved unusual and unique to the school system framework for classrooms. The project to be completed by August 2022 has undergone partial completion due to Covid related delays.
